

---

## Asset Management

We structure and manage discretionary funds and segregated accounts to facilitate institutional investment in public and private fixed income assets.

We are currently investing more than \$3B on behalf of insurance companies and pension funds across multiple asset classes and investment horizons.

## Investment Advisory

We provide strategic advice, portfolio modelling and valuation services in relation to secured loans, structured debt, bonds, NPLs and other fixed income assets.

We have advised central banks, regulators, institutional investors, funds and corporations on transactions with a value of more than \$110B.

## Private Placement

We design and manage distribution processes, with a particular emphasis on private, complex or illiquid assets and structures.

We have placed more than \$30B of assets for a diverse client base including hedge funds, asset managers, banks and family offices.

## Technology

We design, build and invest in technology solutions which have applicability to fixed income, direct lending and asset management.

We currently have investments in four technology companies relating to financial data, working capital, client on-boarding and new fintech development.
