Latest Investments

Exabeam

Exabeam is the Smarter SIEM™ company. Exabeam empowers enterprises to detect, investigate and respond to cyberattacks more efficiently so their security operations and insider threat teams can work smarter. Security organizations no longer have to live with excessive logging fees, missed distributed attacks and unknown threats, or manual investigations and remediation. With the Exabeam Security Management Platform, analysts can collect unlimited log data, use behavioral analytics to detect attacks, and automate incident response, both on-premises or in the cloud.

Alation

Alation's enterprise collaborative data platform empowers employees inside of data-driven enterprises to find, understand, and use the right data for better, faster business decisions. Alation combines the power of machine learning with human insight to automatically capture information about what the data describes, where the data comes from, who's using it and how it's used. Alation is based in Redwood City.

AllyO: Helping you win the Talent War with Boring AI (Artificial Intelligence)

By [Jai Das](#) - June 5, 2019

We believe AllyO is the perfect example of the real value of AI, which is replacing boring, repetitive tasks that a recruiter does not particular enjoy, and then mining the data to not only connect candidates to the most appropriate jobs, but also making sure that the candidates who become employees are productive and satisfied over time.

Riding High with Highspot: Why Sapphire and Highspot Are Excited to Partner

By [Rajeev Dham](#) - June 4, 2019

I couldn't be more excited to announce our partnership with Highspot in their Series D. Before I let Robert Wahbe, CEO and co-founder of Highspot, shed some light on our partnership, I'd like to outline why we are thrilled to join the extended Highspot team to build the next Company of Consequence.

The Do's and Don'ts of Sustainable Consumer Startup Growth

By [Paul Levine](#) - May 21, 2019

If you've been following the world of consumer tech for the last ten years, you know it's become increasingly difficult for consumer internet startups to find scalable and cost-effective growth channels. As an investor in consumer internet companies, I've found this question - does a company have a scalable growth engine? - to be one of the most significant determinants of success or failure.
