

Liquidity Solutions & Growth Equity

We use our capital, creativity, and experience to offer liquidity solutions and growth equity that enable private technology companies to realize a higher trajectory of growth and success.

delta-v:n., the total '*effort*' required to change from one trajectory to another

delta-v:n.,
the total '*effort*' required to change from one trajectory to another

Liquidity Solutions

We were founded with a focus on providing secondary liquidity solutions to shareholders in private technology companies. Current and former management team members, founders, and other investors including individuals, angels, venture funds, and corporate have realized liquidity from Delta-v. We aim to provide a win-win outcome when the diverging liquidity needs within a company's stakeholder base run counter to shareholder stability and vitality.

Growth Equity

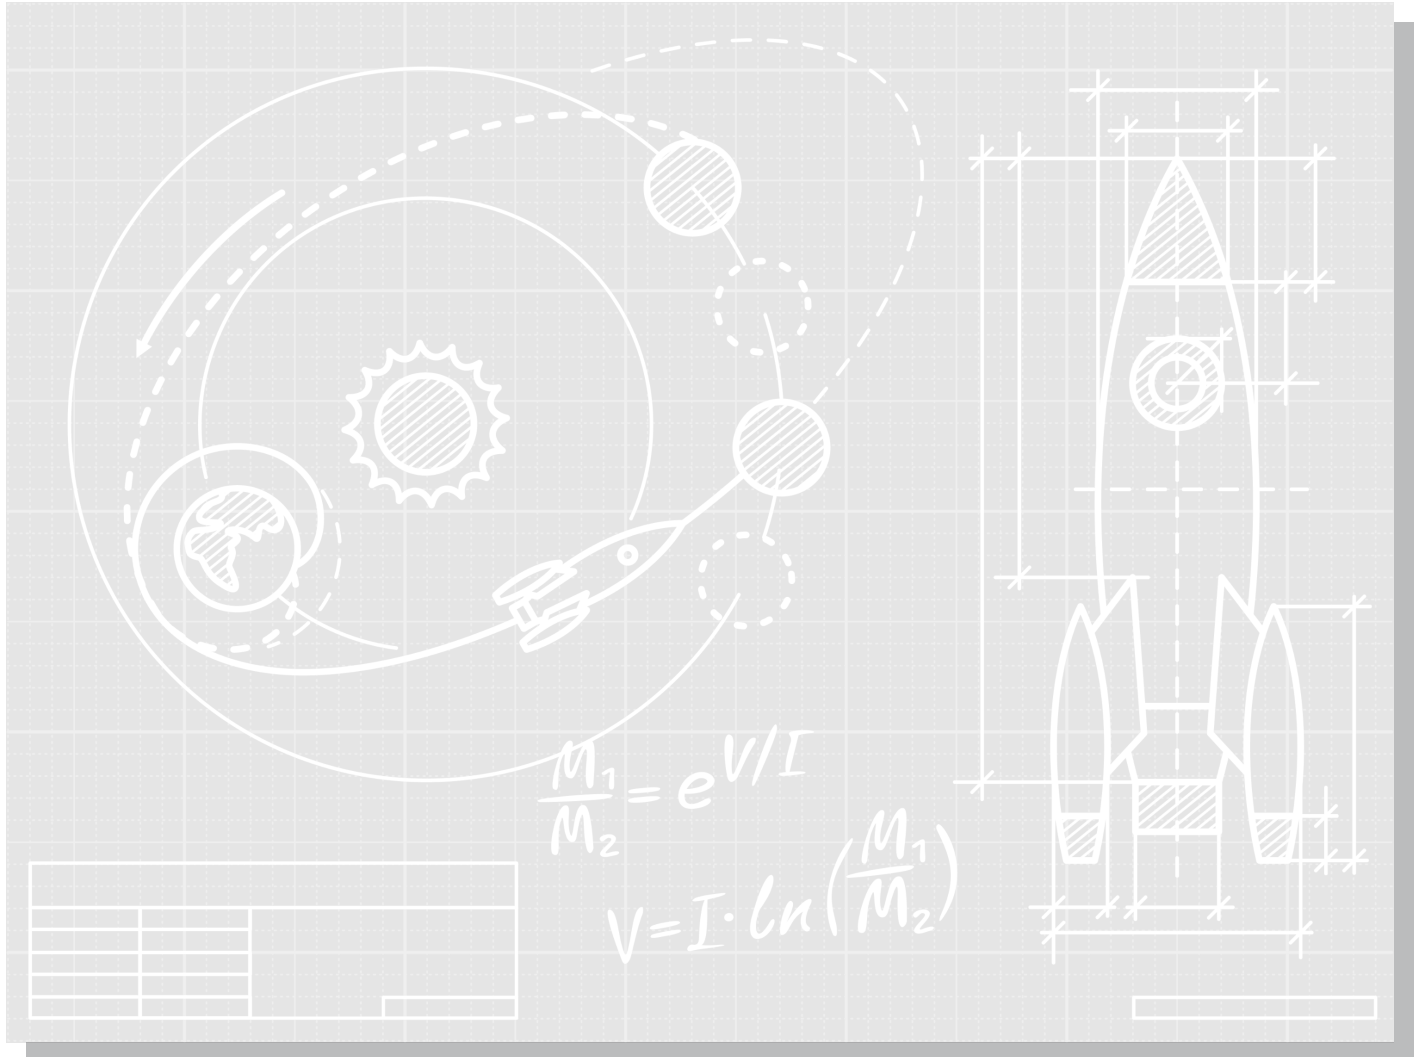

We partner with market leading companies with proven business models to provide the capital required to accelerate growth through a targeted use of proceeds. Our goal is to help management teams create value through profitable revenue growth. Our targeted companies don't need growth capital to maintain the status-quo, but instead understand that investing in the business in the right areas will allow them to achieve a higher trajectory.

$$\Delta v = \int_{t_0}^{t_1} \frac{|T|}{m} dt$$

Target Investments

We target interests in companies that have substantially removed product and business model risk, and are typically in the process of scaling the company with healthy growth rates and current or near term profitability.
