SCOUT ENERGY PARTNERS

Scout is a private investment firm, acquiring and operating mid-sized upstream conventional oil and gas properties on behalf of institutional investors.

Scout focuses on mature, conventional producing assets with strong operational and production improvement potential. Scout investors typically seek real asset exposure, consistent returns, periodic cash distributions, spending power preservation and a hedge against currency and inflation risks.

The Scout funds are designed for institutional limited partners, including academic endowments, public and private pensions, foundations, multi- and single-family offices, funds-of-funds, healthcare systems and insurance pools.
