

# GREENLEA LANE

Greenlea Lane is an investment management firm, which was founded by Josh Tarasoff in 2006. Its mission is to be a world-class investment that makes a difference for a group of Partners with whom Josh feels a personal connection. Its strategy is to identify the most exceptional companies that it can understand, buy cheaply, and hold on for the long haul, ideally forever.

Greenlea Lane is single-mindedly focused on the long term. We think about what intrinsic values could be in 5 years, 10 years, and beyond. We tune out volatility in the market prices of our holdings. We cautiously expand our circle of competence. We continuously refine the investment process and deepen the practice of our key disciplines. These are the important issues that receive our attention.

Greenlea Lane does not actively solicit or market to prospective investors.
