

Welcome to SightLine Partners

We are an alternative investment manager providing custom equity financing for differentiated, growth-stage healthcare companies.

The healthcare opportunity

This is a golden age of healthcare innovation. Breakthrough products and therapies are extending life, improving delivery of care, and shrinking costs. It continues to be a big opportunity for wise investors who understand this space.

That's where we come in

SightLine invests in select, high-potential healthcare companies to unlock value others can't.
□ Through custom financing solutions and active management, we help propel these companies to the exit and realize consistent performance for our investors.

Worthy Companies

We invest in companies □ consolidators want to buy: commercial-stage healthcare innovators with market-proven □ products supported by solid medical evidence, regulatory approvals, and a plan to exit within 5 years.

Custom Structures

Each company and situation is unique. We provide customized financial structures to meet the needs of targeted companies while seeking the optimal risk/reward profile for our investors. Through creative deal structuring, we seek solid downside protection with potential for enhanced upside returns.

Reliable Returns

By actively guiding companies to the exit, we help investors get their money out sooner. □ We target consistent minimum returns across the portfolio with a shorter investment period and quicker □ distributions than typical funds.

Meet our team

We are healthcare veterans with decades of collective experience in operations, finance, private equity, □ venture capital and investment banking. Since April 2009 our team has established a successful strategy through collaboration on multiple funds.
