

Welcome

With expertise across a range of asset classes and specialist investment sectors, our approach to investment is driven by a commitment to provide the best possible outcomes over the long term for our investors.

Responsible
Investment

Our people

About us

Investing with us

Our underlying investment philosophy is to provide quality investment products to clients that deliver investment outperformance over the long term and through market cycles. We have a range of investment styles which vary across our investment teams.

Each of our investment teams has the ability to make autonomous decisions. While the investment teams work independently of each other, all decisions are underpinned by a common commitment to the principles of Responsible Investment, stewardship and quality which are embedded across our business as a whole.
