OUR SERVICES

**“If everyone is thinking alike,
then somebody isn’t thinking”**

George S. Patton

Access Equity Management Limited can implement global macro opportunistic investment strategies to capitalize on macroeconomic and geopolitical major changes in fundamentals.

As governments and central banks drive markets, this strategy turns these policy decisions into actionable trades, on a global basis, as these factors are moving markets like never before.

Buy fear and sell complacency, be very selective, never follow conventional wisdom.

Accurately determining how much information is priced into a position and establishing fair value is the key to identifying the best entry point.

Access advise on a wide range of securities for diversification expressing investment opinions frequently through liquid Exchange Trade Funds. ETFs are broad in scope and move based on systemic risk, which is not security specific, which trade on exchanges and track stock, bond and commodity indexes. ETFs offer diversification with lower management fees and higher intraday price visibility.

Appointed Representatives Programme

Since 2003, we have worked with a select group of Appointed Representatives that share a common approach to identifying unique, specialist alternative investment opportunities.

Partner firms share ideas, deal flow and opportunities across the Access network.

The Appointed Representatives are regulated and audited within a structured supervisory framework. There is limited capacity for these relationships. However If you believe your firm could benefit from this partnership,
