## What makes us different

With more than 60 years of combined professional investment experience, we believe markets are efficient and investment returns are determined by asset allocation, risk management, and transparency of cost, not manager selection.

We work to simplify the investment process and remove emotion from investing by offering rules-based investment portfolios that are constructed using efficient, low-cost investment vehicles such as exchange traded funds.

We do not offer proprietary products and when managing portfolios under an Investment Advisory Agreement, we have a legal obligation as fiduciaries to put the client's needs first.
