- This website contains information about investment funds which invest in equities, bonds, money market securities and/or other instruments, each with its specific investment policy, features and different risk profiles. The fund(s) may not be suitable for all investors.
- Some funds may invest in equities, investors should note the equities risk.
- Some funds may invest in bonds or other fixed income securities which are subject to (a) interest rate risk (b) credit risk (including default risk, downgrading risk and liquidity risk) and (c) risks relating to non-investment grade bonds and/or unrated bonds and/or high yield bonds.
- Some funds may invest primarily in emerging markets, smaller companies, a single country/region and/or industry sector, the investment focus of such funds might give rise to increased risk over more diversified funds. Funds investing in Europe are subject to the risk of Eurozone crisis .
- Some funds may use financial derivative instruments (FDI) extensively for hedging and efficient portfolio management purposes but will not use FDI extensively for investment purposes. Some funds may use FDI as part of the principal investment policies and strategies. The funds' use of derivatives may become ineffective and they may suffer significant losses. The use of FDI also involves special risks including but not limited to liquidity, volatility, leverage and counterparty risks.
- Some funds may invest in China A shares which involve certain risks (such as greater political, tax, economic, foreign
