

THE 401(K) FEE BENCHMARKING TOOL FOR PROACTIVE PLAN FIDUCIARIES

The retirement industry makes analyzing and comparing fees complex. We make it simple.

How it works

The easiest way for any company to gain clarity, context and control over retirement plan fees

Submit your plan data

The first step is for a company representative (e.g. plan fiduciary, CFO, VP/Director of HR, etc.) to sign up and send us your fee disclosure data so we can enter it into the system.

Compare your plan fees

Then we provide access to your plan summary portal to see a clear breakdown of all the fees your plan is paying and how this compares to other similar plans based on 8 comparison metrics.

Negotiate with more accuracy

With unparalleled transparency, you've got a roadmap to drive accountability with your vendors, negotiate smarter and drive down costs for your company and your people.

Manage your fiduciary risk

You fulfill your fiduciary duties under ERISA to make sure fees are reasonable on an ongoing basis while having a documented process to show for it.
